

ABSTRACT OF THE DISCLOSURE

The invention provides a thin metal layers-having ceramic green sheet comprising: a base film; a first thin metal layer formed on the whole surface of the base film; a second thin metal layer formed on the first thin metal layer in the form of predetermined pattern; and a ceramic powder-dispersed layer which comprises a binder and a ceramic powder dispersed therein and which is formed on the metal films including the first thin metal layer and said second thin metal layer. Also disclosed is a method for producing a ceramic capacitor using a plurality of the thin metal layers-having ceramic green sheets.
